

UFO 436

By

Milos Dimitrijevic

FADE IN:

EXT. EARTH'S ORBIT

We see Earth's northern hemisphere. Suddenly, the blue-lightning wormhole opens above the Earth's part that we see. It lights mostly blue and purple in the middle. From the wormhole output a silver space ship, superior rocket-looking, blinking with red light at the back. It flies to the Earth. Few moments after the ship is came out from wormhole, the wormhole slowly disappears. As more and more is closer to Earth's surface, ship blinks faster. The ship goes into the atmosphere, in aria of Kansas, USA. Keep's flying very fast without making big noise and almost will fall down.

EXT. KANSAS ARIA - NIGHT

Beyond hill where is no any civilization, ship falls to the ground and stands still. After few moments doors suddenly opens and a machine rashly comes out, from the lying position, a robot which looks like man that is programmed to find something on Earth. The robot has two hands and two legs, head, and is about 2 meters tall. When is stands on the ground, first things that he takes are weapons, a futuristic guns ready for any action.

EXT. BEYOND HILL - NIGHT

Robot is now going to the specific location from his navigation, that he has on the right hand. We see some unknown destination units, looking through his eyes. He begin to go faster and faster, with the speed like human's running.

EXT. STREET IN THE KANSAS - NIGHT

Three young guys walking around street and discuss about "something on sky". There is almost no people on the streets.

GUY 1

I know that I'm saw something on sky, I don't care if you believe me or not.

GUY 2

Yeah, well, you're probably only one in United States that have seen

(MORE)

(CONTINUED)

GUY 2 (cont'd)
some alien ship and we should
believe you.

GUY 1
We'll see that I'm only one, but I
tell you, something was blinking
red in the sky and fall down
somewhere near Kansas.

GUY 3
I think I've been watching some
similar Movie.

(GAY 2 and GAY 3 laugh)

EXT. STREET IN THE KANSAS - NIGHT

Robot is now on the streets and time is about 1hour after
midnight. Almost is no one on streets. At the crossroads
from one side are 3 guys steel talking about UFO with lots
of humor and joking.

GUY 1
Alright maybe I was hallucinated,
but don't get scared if you see
some aliens around Kansas.

GUY 2
I'm not worry about that, because
you're will be the only one who sow
aliens.

GUY 1
If I see something, I will record
with my phone and show you.

INT. THE OFFICE IN THE NASA CENTER - NIGHT

Few people investigate unusual event on sky that night.
Looking to their computers and statistics, they consider
that this is "UFO no 436", It is actually 436'th they have
been registered. They look bad short video of the ship's
flying. It can be seen red blinking and falling of the ship.
MRS. DAVIS is a white woman with dark hair, about 1,7 meters
tall, scientist in early forties. MR. WALTER is a white man,
a little bald, about 1,8 meters tall, also scientist in late
forties. They look to reports of all rockets that have been
sent and see that this isn't case with that.

(CONTINUED)

MRS. DAVIS

Alright, we definitely know that this is not any of the satellite parts that falling from orbit. I hope that we can resolve this. What you think Walter?

MR. WALTER

Sure, we will sent the team right away to see what is about.

INT. IN HELICOPTER - NIGHT

Three people travel and talk about the mission. ROBERTS is a white man with dark hair, good looking, about 1,8 meters tall and about thirty years old. He's a leader of the team. COOPER is a black man with short dark hair, about 1,85 meters tall, in late twenties. ANDERSON is white man with blond hair, about 1,8 meters, in late twenties.

COOPER

We've finally move somewhere out of base. I'm boring.

ROBERTS

You not vary what could be out there. This is something totally unknown.

COOPER

C'mon, it's probably some broken satellite fall down after it lose its energy. I hope it has some information useful, so we not be going for nothing.

ANDERSON

I know that you'll be laugh but maybe this is not something from Earth's technology. If it is, they will not be send us to investigate.

COOPER

Oh, Anderson, c'mon man you really think that this is some alien ship come here on Earth. You really like SF movies.

ROBERTS

Cooper, whatever it is, we know nothing about it and I expect totally professionalism and

(MORE)

(CONTINUED)

ROBERTS (cont'd)
precautions. You must to be ready
for any situation.

PILOT
(opens window of his cabin
while he flies to the ground)
We're almost done, I can land only
here.

ROBERTS
OK, we will continue walking from
here.

EXT. BEYOND HILL - NIGHT

The team come out the helicopter, Looking around the area
and their navigation devices. Roberts see in which direction
they should be going.

ROBERTS
Alright boys, let's go to see what
it is.

COOPER
If is some alien ship, and we stay
alive, I'll pay you a drink.

Now the team is closer to the ship. They don't see ship.
Roberts is aware that they will see something very soon. He
stops first and look to his navigation device.

ROBERTS
It should be behind this shrubbery.

As the team moves slowly around the shrubbery, they
beginning to see a "UFO 436". A superior rocket still
blinking, but now that is only small blue light within the
doors. It is long like some sports car, and wide enough to
robot can put into it in lying position. They are
astonished, realizing that this ship definitely is not from
our world. Roberts is beginning to approaching to the rocket
to take a better look. He takes his photo to record alien
ship. All members of team are very tense, especially
Roberts, and in the moment when he push the button and take
a picture, ship beginning to light more with the different
colors, like its responding to flash of the photo device.
They starts to run as fast as they can, not aware that only
member of alien ship has already left it. They could only
run conversely from helicopter. After 120-130 meters they
stops to run realizing that ship is stop to blinking.

(CONTINUED)

ROBERTS

Shit! I fill my heart in the my neck.

COOPER

Man, this rocket scares me more than anything else!

ROBERTS

It's stop with the blinking, let's take few photos from here and report to NASA right now!

ANDERSON

I don't understand, if someone's in that ship, he would be came out now.

ROBERTS

You're right, but let's not closing to the ship, I'll try to take a few pictures from here and we will try to bypass this thing. Roberts makes few photos and ship is not responding from that distance.

ROBERTS

Let's go out there, to be little bit far from the ship. They all walking to the helicopter and make conclusions and theories about the ship.

EXT. STREETS OF KANSAS - NIGHT

GUY 1, 2, 3 going in the side street, closing to the crossroad, they are in the shadow and can't be seen from crossroad. At the crossroad appears robot from the one side and a man and woman from the other side, in a good mood. They noticed him and start to joking.

MAN

Hey, look at this my darling, it's probably some guy from Star Wars, 3ZPO if I remember...

Robot stand still, looking to the couple without any responding. Man starts to approaches to robot thinking that this is a man who's just kidding, offering his hand.

(CONTINUED)

MAN

Hello. I'm R2D2.

After 6 seconds robot shot on man and woman so fast that they didn't have time to realize what happened. Their bodies are almost melted from his laser weapon. Three guys are saw this from side street and at the same moment they were clearly what is just happened. They beginning to run. Robot didn't noticed them.

INT. THE OFFICE IN THE NASA CENTER - NIGHT

Soon after this happenings they all know what happened in the streets of Kansas and realize that this isn't coincidence with the case "UFO 436" and, according to report of Roberts team, it is very clearly that this robot is left the mysterious ship which is near Kansas. They are all now in the same office, looking photos and discuss about the ship and robot.

ROBERTS

This ship's only function was probably to bring the robot to our planet and bring him back there, where is he came from.

MRS. DAVIS

Well that is obvious, but we can't allow to that machine from other planet to kill people on streets. If I'd saw him, I would be thinking that some idiot is joking in suit but this thing shot with laser.

MR. WALTER

We will send special crew, I was spiking with the Prime Minister of Defense. They will search for robot, but, Roberts, if you think that the ship is left alone with no crew, we must take a very close look to that thing. We must to find out everything we can.

ROBERTS

I agree, but that wouldn't be easy at all. We need experts from few area, and of course maximal protection from any possible dangers. I don't think that the ship could explode and kill us all, but I do not believe that it just

(MORE)

(CONTINUED)

ROBERTS (cont'd)
waiting for us to come into it. It would be very hard to open the doors but if we do that, maybe even find out from where is it came from...

MRS. DAVIS
(Interrupting)
Definitely not from some near place. Look what is one satellite recorded before 2 hours.

They all watching the footage of satellite from orbit and see wormholes opening, ship's coming out and wormhole's closing. This process has been few seconds long.

ROBERTS
This is definitely the greatest phenomenon I've ever seen! I simply can't believe!

MRS. DAVIS
According to this footage this ship is came from far distance. These are measurement results from other satellite, and radiation of the wormhole was so strong and it's structure is so unknown that it was merged in the best case point in are orbit and point in far distance in our galaxy. In any other case, ship could be came from some other galaxy whether is that galaxy in are cluster, or in the end of the universe.

MR. WALTER
Can they do more detailed inquiring and find out approximately from where is ship came from?

MRS. DAVIS
The team already working hard to find out everything they can. It is already sent one satellite in place near the wormhole was opened.

MR. WALTER
I don't know is that safe, what if wormhole opens again in the same point?

MRS. DAVIS

Professor Carter believe that wormhole can't open and close in the same point in shortly time. This is only his opinion but after all, he knows better than us.

ROBERTS

Who is Professor Carter?

MRS. DAVIS

Greatest expert for this things that I know. As soon he finish inquiring he will join us here.

MR. WALTER

Alright, until then, let's see what is happened with robot.

EXT. KANSAS PERIPHERY - NIGHT

It's about 2 hours after midnight. There is no people on the streets. Special military team follow robot, which searching for something. They are in the distance of about 100 meters, try to record him and study where is his weapon and how he can use it. LT. SMITH is a black man with dark hair, good looking, about 1,8 meters tall, in late twenties. J. J. is a white man with very short blue hair, about 1,9 meters tall and very muscular, in early thirties. JAMES is a white man with brown hair, about 1,75 meters tall, in early twenties.

LT. SMITH

Let's keep follow at this distance, it seems that he can notice us only if we get closer to him.

J. J.

I definitely don't want to get closer to him, did you see what he done with that couple, he burn them man!

LT. SMITH

Yeah, well he can't do that to us, we have special suits.

JAMES

Who knows that this suits can protect us from his laser weapon? If we only know that this bombs would destroy him, I would be the one who killed the space bastard.

(CONTINUED)

LT. SMITH

I don't think that you can actually kill him. This is probably just a machine which is programmed to do something, obviously to find something, so it can be only destroyed. I hope he won't attack people. And let me warn you, we don't have an order to destroy him, even if we can, we can only defend us if he make any trouble.

At this moment Mr. Walter calls Lt. Smith and give him instructions.

Mr. WALTER

(VOICE)

Lt. Smith, how's the thing going?

LT. SMITH

Not bad sir, we just follow him. It seems that he only want to find something, and he shot on people only if they oppose him.

INT. THE OFFICE IN THE NASA CENTER - NIGHT

MR. WALTER

(Speaking with Lt. Smith)

Alright, you just follow him and find out more about him, you know, how's he act and what he would do if we attack him surrounded. We will see what can we do about the ship.

LT. SMITH

(VOICE)

Yes sir!

MRS. DAVIS

Three young guys are been there when robot is killed that couple. They say that the man was joking with robot and offered him hand and then robot simply kill them both, like they was some obstacle to him.

MR. WALTER

Yes, but what about that three guys?

(CONTINUED)

MRS. DAVIS

They was running after they saw that.

MR. WALTER

Alright, let's go to see that ship and find out what we can.

INT. IN HELICOPTER - NIGHT

Davis, Walter, Roberts, Cooper and Anderson going to see ship and make plans how would they open it and find out more about it.

MRS. DAVIS

I steel wondering, what he could searching here on Earth? What could be so important?

MR. WALTER

As we can see, he not care about humans. He kill them like they are common barriers.

ROBERTS

I've been thinking about that. If that what he searching has no any common with human civilization, we can have a big discovery. I hope that we can open that ship and see what it's like.

MR. WALTER

Many people are already there. We have lot of experts as you wish, Roberts.

ROBERTS

Yes. I'm only worry about how can we open the doors. When I was take first picture, from the distance of about 2 meters, ship is just frenzied. In the moment when I was push the button whole rocket was start to blinking with different lights. We was scared and immediately start to run.

ANDERSON

Yeah, Who could knew what would happened with the ship. It was very scary in that moment.

EXT. BEYOND HILL - NIGHT

Many people are surround ship. Try's to understand the logic of ship and it's opening mechanism. The helicopter is closing to the aria and it will land down. Team is preparing to get out. Everybody look at the ship. Davis and Walter are surprised with the ship's look.

MR. WALTER

So this is it. It looks superior than I was thinking.

MRS. DAVIS

I hope that isn't powerful as I was thinking.

All of them came out when helicopter was landed and go closer to the ship. The ship still blinking blue over the doors. Roberts lead them, going between all this people around the ship. They come beside ship and look at him with great wonder, especially Davis and Walter.

MR. WALTER

If I was on your place Roberts, I would be fainted in moment when it's start with lighting.

16 ROBERTS

I was feared that it would be shooting us. We was very scared.

They look around ship, especially the doors, and then MRS. Davis notes Professor Carter. PROFESSOR CARTER is a white man with glasses, a little bald, about 1,75 meters tall.

MRS. DAVIS

Professor Carter, let me present you my team. This is Mr. Walter, my colleague, and these are members of our team for an emergency, Mr. Roberts, Mr. Anderson and Mr. Cooper.

PROFESSOR CARTER

Nice to meet you gentleman.

MR. WALTER

Pleasure is ours, Professor. We've heard that you are expert in aria of black holes and similar things.

(CONTINUED)

PROFESSOR CARTER

Yes, this is what I do. But this case is not confronted with black holes. In this case portal is obviously deliberately open in right place, in Earth's orbit. They knew exactly where to open a wormhole.

MR. WALTER

Can we know from where is he came from? Probably not from some close planet...

PROFESSOR CARTER

I've been studied this phenomenon, and frankly I can't find out many facts. All what we know is that in the point where was wormhole opened, radiation is still so strong that the other point, which was merged with are, is probably in some of the nearby galaxy.

MRS. DAVIS

Maybe we can find out more from this ship, if we could only open it.

ROBERTS

That is only thing we could try. But let's see how ship react on us.

Roberts take one camera, one photo device and first record ship with camera. He creates video footage 30 seconds long. Ship is not responding. Now, Roberts take photo device to take a picture. In moment when he push the button, ship again starts to blinking fast with many colors. This effect is scared everybody except Roberts, Anderson and Cooper. Everybody stares at ship which is stop to blink after few moments. In that moment Lt. Smith calling Mr. Walter.

LT. SMITH

(VOICE)

Mr. Walter, we could have situation here.

MR. WALTER

What is about Lt. Smith?

LT. SMITH

(VOICE)

Robot is about 90 meters from us, and he was stopped in one place

(MORE)

(CONTINUED)

LT. SMITH (cont'd)
between two buildings. It seems
like he make some measurements,
like he searching for something in
the ground.

MR. WALTER
So?

LT. SMITH
(VOICE)
Well, I don't care if he start to
dug up something, but, we heard
that on this road will very soon
pass through bus with some
tourists.

MR. WALTER
Yes, I understand. If the robot is
still there and bus can meet with
him, send few people to stop the
bus and said that this is an
emergency. If they can, let them go
on some side street.

LT. SMITH
(VOICE)
Yes sir!

MR. WALTER
It seems that he start to searching
for something between two
buildings. And, through that street
where are that buildings should to
pass some tourists in bus.

MRS. DAVIS
What did you tell them?

MR. WALTER
To stop the bus if robot is still
there.

EXT. ON THE STREETS - NIGHT

Lt. Smith and it's team observe robot, which still making
measurements. We can see some delicate units on robot's
device on left hand. One of the members of team comes to Lt.
Smith and said to him that the bus is almost there. While
they still looking at robot, Lt. Smith gives the order to
few solders to stop the bus, which will be there for a few
minutes. Three solders almost silently goes to intercept bus

(CONTINUED)

in distance of between 300-400 meters. Robot is still in the same place, like he wait for some results of measurements, which could be seen through his eyes. Solder calls Lt. Smith. Lt. Smith answer still looking at robot.

SOLDER

(VOICE)

Sir, the bus will be here in a minute. We see him.

LT. SMITH

Good. Stop them, and tell them to go in side street as far is possible.

SOLDER

(VOICE)

Yes sir!

EXT. ON THE ROAD - NIGHT

Bus is closing to the soldiers, which signal to stop. Driver see soldiers and slows the bus. Almost all passengers sleeps. He stop the bus in front of soldiers and opens his window to ask them what is about.

DRIVER

What is it boys, why we must stop here?

SOLDER

We have an emergency situation here in the immediate close.

DRIVER

Do we have to stop for a while?

SOLDER

Situation is very complicated, best for all is to you go in some side street in distance of one mile. You can't go on this road.

DRIVER

But I must go here, I have 40-50 passengers which I must to drive home.

SOLDER

We have order to stop you for your safety. You simply can't go to this road!

(CONTINUED)

DRIVER

What should I do?

SOLDER

See that crossroad? Try to go there and then right. There is probably parallel street and you must go there to bypass this street. We will observe you. Do not try to go in this street, OK?

DRIVER

Alright sir, if you say so.

SOLDER

Good. We will look at you from here. So, no mistakes...

Bus turn around and goes to crossroad. It goes into the parallel street and continue its driving. Solders follow the bus and look at him. Solder calls Lt. Smith.

SOLDER

Sir, the bus is now going in parallel street, there is no danger for them.

LT. SMITH

(VOICE)

Good. You can come back here to continue our job.

SOLDER

Yes sir!

EXT. ON THE STREETS - NIGHT

The crew still looking at robot. Finally, we can clearly see on his device that the results are almost done. Robot starts to go in the direction of street where the bus will come at any moment. Three soldiers are far from crew which looking at robot. The crew start to closing to the robot, clearly sees that robot can meet with the bus, which goes slowly. Robot continues to go in same direction and he will be on street where bus should pass through. The crew keeps to closing to the robot and they are distanced about 30-40 meters. Robot not responding to them because they are behind him. Robot want to continue in same direction, but he see the bus on his right side , which starts to slow down in moment when driver is saw robot. Driver don't know what is happening, and in a distance of about 50 meters from robot bus is stopped. Robot look at the bus. Lt. Smith is already called Mr. Walter.

(CONTINUED)

LT. SMITH
Mr. Walter, we have a situation
here!

MR. WALTER
(VOICE)
What is happening?

LT. SMITH
Robot is now faced with the bus
which is in danger. Can we shot on
robot if he attack bus?

MR. WALTER
(VOICE)
Yes, but how much will that help?

LT. SMITH
If we can't destroy him, we can
only draw attention to him.

MR. WALTER
(VOICE)
Alright, do what you can.

EXT. BEYOND HILL - NIGHT

All people follow very tense situation with robot and bus.

MR. WALTER
Who knows what is going to happen
now. Robot could shot on bus.

ROBERTS
Yeah, if he sees them as an
obstacle.

MRS. DAVIS
What would they do anyway? We all
know what was happened with those
couple. He burn their bodies.

MR. WALTER
I know, well we can only wait to
Lt. Smith report me what was
happened.

EXT. ON THE STREETS - NIGHT

Robot is not moving from the street, still looking at bus. Soldiers are ready and have robot on sight. Driver is confused and starts to get out the bus. Robot responding very fast on this driver's move and he pointed a gun on bus, ready to fire.

LT. SMITH
 Fuck! Alright everybody, on my
 signal fire on robot. Fire!

Soldiers start to shot on robot with powerful mines and he becomes to fall on the ground opposite direction from soldiers. All that shots can't destroy him, they can only make him fall down. He fall down and stand up few times very quickly in just few seconds. He didn't shot on the bus because in last moment soldiers was start to shot on him. All passengers in the bus are start to run in side street, including driver. On drivers face can be seen fear, and he is totally sweaty and confuse, he hold his right hand on his heart and together with passengers he is at the other side of the building. They hear shots from other side of the building, just like they are in war.

EXT. ON THE STREETS - NIGHT

Soldiers still shooting on robot, which is still in same position, he continues to fall down and stand up, but all that bullets and mines can only throw him down, he don't have any damage on his body. Soldiers start to shot on him with bombs and they can find shelter behind parked cars and behind buildings. Bombs have better effect, robot can only stand up slowly but he act much more weak and powerless.

LT. SMITH
 (To soldier)
 Let they send us fucking backup!

SOLDIER
 Yes sir!

Soldier calling backup with communicator. Big explosions were seen among the streets.

EXT. BEYOND HILL - NIGHT

All people can hear what is happening on streets in Kansas and follow the situation in very tense atmosphere. Roberts and Mr. Walter look each other while they listen what happenings. At the same time while they look each other,

they look at the ship, realizing that ship has no responding on robot's condition.

EXT. ON THE STREETS - NIGHT

Robot still didn't shot on soldiers but he is still in same condition. He just tries to sight on them and fire, but he can't do that because they still shot on him with all power they have. Soldiers are successfully surrounded robot and he seems to be confused because he is attacked from all sides.

LT. SMITH

C'mon god damn! Can you just blow up!

At this time backup has come and they have more weapons and ammunition. While the situation is still same, robot just falling and rising, one soldier from backup comes to Lt. Smith with very powerful gun and he is almost ready to shot on robot.

LT. SMITH

(To soldier)

On my signal.

Soldier is ready and have robot on sight. We can see robot through the gun sight. Robot is still attacked from few sides, but soldiers take position to be safe when gun shot on robot. Now, just one second after soldiers stop to shot with bombs, soldier with very powerful gun is ready to shoot, his finger is on the trigger.

LT. SMITH

Fire!

Soldier shot on robot. It was very noisy and very big explosion. He hit robot in the middle and robot can't be seen from smoke and fire which burning on place where is he. Now, robot can be seen while the fire still burning around him. He lays on street like he is destroyed, but now he can clearly be seen and his body is still not damaged. He just lay with no response, but he looks same as before, soldiers start to approaching to him and look at him very confused.

J. J.

What a fuck is going on? Is he dead? I mean destroyed? Why is he still is one piece?

JAMES

Yeah, if he is destroyed he wouldn't be in one piece. I don't understand.

(CONTINUED)

LT. SMITH

Well, we all don't understand,
mystery never end. I think that I
should call Mr. Walter.

MR. WALTER

(VOICE)

You don't need to call me
Lieutenant. We all listen situation
and we are very scared and
confused, almost like you boys.

LT. SMITH

Yeah, he doesn't move, what you
people out there think? Was it any
changes on that ship?

MR. WALTER

(VOICE)

We also can't understand. Ship
still don't react on robot's
condition, just like he don't have
any connection with him. Nobody not
have some video how robot leaving
ship, but it's very little
possibility that this two machines
have no connection. We don't think
that this is a coincidence.

LT. SMITH

Yeah, it's logical that the ship
was bring him here and if he finish
his mission, he would probably back
there with his ship, if that is his
ship.

EXT. BEYOND HILL - NIGHT

MR. WALTER

(to communicator)

We here will continue to studied
this ship, but you there be careful
with robot, don't let him to
surprise you. He obviously isn't
destroyed, I hope he is, but if he
still looks the same, you can't
know what could happen.

LT. SMITH

(VOICE)

Yes, well we keep real good eye on
him. We'll try to evacuate this

(MORE)

(CONTINUED)

LT. SMITH (cont'd)
people from the bus, fortunately
don't have victims here.

MR. WALTER
Good, do that and be careful now,
that robot is still big problem and
big mystery, unfortunately.

LT. SMITH
(VOICE)
Yes sir, We can stop conversation
now. If something happen we will
call you, and, if something happen
with ship, you call us immediately,
because it could have connection
with robot.

MR. WALTER
Alright, we'll do that.

Mr. Walter is finished conversation with Lieutenant and
joining to other people which are surrounded ship. They
continue to studied ship. Few people make theories and
predicted what could happen with robot and ship.

EXT. ON THE STREETS - NIGHT

Soldiers should evacuate people from the bus, but all of
them are still very careful, especially Lt. Smith. He and
few others stares at robot.

LT. SMITH
Alright, while we look at this
thing, you try to evacuate these
people. Where are they?

J. J.
They where hide behind building,
probably they all there wait for
us.

LT. SMITH
You and few others take them away
from here. Tell driver to start bus
and continue to the main road,
where they should be pass through
earlier.

J. J.
Yes sir!

(CONTINUED)

At this moment while J. J. and few soldiers are just begin to go to the people, robot's head was start to blink with red color. All soldiers was seen that and get panic.

LT. SMITH

Shit! I knew that it's isn't destroyed! J. J., watch that people out there!

J. J.

Yes sir!

J. J. goes to people with three soldiers. From the beginning of robots lightning, Mr. Walter was already called Lt. Smith to tell them that ship is act similar as the robot. Lt. Smith and all others take position and they are ready for fight.

MR. WALTER

(VOICE)

Lieutenant, ship was start to blink red. What is happening with robot?

LT. SMITH

Robot also blink with red color, actually, his head blinks just about few seconds.

EXT. BEYOND HILL - NIGHT

(Mr. Walter continues to speak with Lt. Smith)

MR. WALTER

We all stare at the ship. Now we know that ship and robot are together, I mean this is one case. However, we here are not in danger as you there. Be very careful, who knows what could happen now.

LT. SMITH

(VOICE)

Yes, I'm not pessimist but I think that could be only bad, I hope that no one's will be killed. Oh shit! It seems that he try to stand up!

All people listen conversation between Mr. Walter and Lt. Smith. In this moment Mr. Walter and Mrs. Davis look each other very scared. Atmosphere is very tense. Mr. Walter notice that ship was stop to blink and he realize that robot could be active again.

(CONTINUED)

MR. WALTER

Lieutenant, be careful out there,
ship was stop to blink.

LT. SMITH

(VOICE)

Yes, and robot is stop with
blinking, like he is going to stand
up.

EXT. ON THE STREETS - NIGHT

Lt. Smith look at robot which is trying to stand up but he do that very slow, like he can't stand on his legs. On his head again appears red light, like his eyes blink a bit faster than earlier. Among soldiers is absolute silence. All of them look at robot and they didn't sure what should do. Robot not paying attention on them and almost is straightened. He stand in that position, like he is bumpy, and after 2-3 seconds he drops again. Lt. Smith calls J. J. very quietly.

LT. SMITH

J. J., Don't do nothing with those
people. He could be shot on them.
Just keep them in sheltered all the
time. If he notice some moves he
could fire on them.

J. J.

(VOICE)

Yes sir!

Now, while the robot is again on
the ground in lying position,
suddenly on his head appears blue
light. While that is happening, Mr.
Walter calls Lt. Smith.

Mr. WALTER

(VOICE)

Lieutenant, ship is now beginning
to light blue. Until now it was
blinking blue but now just light
without blinking. What is happening
out there?

LT. SMITH

Robot didn't blinking blue, but
suddenly his head was start to
light blue.

(CONTINUED)

ROBERTS

(VOICE)

(Interrupting in conversation
between Mr. Walter and Lt.
Smith)

That is bad sign for me, I hope I'm
wrong but from the beginning ship
was blink blue. It seems like blue
light means of well-being. I hope
it's isn't but you know...

EXT. BEYOND HILL - NIGHT

Roberts and Mr. Walter together speak with Lt. Smith while
all other people listen them and look at ship which still
light blue.

LT. SMITH

(VOICE)

Yeah, I was also thought like that.
If there is any logic...

Lieutenant is stop to speak with Roberts and connection is
still opened.

EXT. ON THE STREETS - NIGHT

Lt. Smith look at robot which appears to definitely will
stand up. He is in same position like when he is saw bus.

ROBERTS

(VOICE)

Lieutenant what's going on?

Lt. Smith don't pay attention on Roberts question. He and
all other soldiers stare at robot. Atmosphere is very tense.
So far, it felt maximum tension and suspense. Robot look at
bus and suddenly, just like his memory is back, he shot on
bus with his laser-gun. The shot was much stronger than
previous on the man and woman. Huge explosion is seen among
streets. The bus is totally destroyed and still burning. All
people on the other side are frightened to death when they
saw this explosion.

ROBERTS

(VOICE)

Lieutenant are you there?

Lt. Smith cuts connection with Roberts.

(CONTINUED)

LT. SMITH
(to communicator)
J. J. Don't let nobody move.

J. J.
Alright sir.

SOLDIER
Lieutenant, what we should do?

LT. SMITH
Nothing. We are unable to do anything against this thing. We can only wait for him to go, I hope that it's happening what I think so.

SOLDIER 2
What is that Sir?

LT. SMITH
Quiet. Don't let him to notice us.

Robot is in same place after he is destroyed the bus. He look to his devices on his left hand, on which can be seen some unknown units, similar as those when he was come here. He continues in direction in which he wanted before the bus was come. Soldiers look at him and finally they can relax.

LT. SMITH
(to communicator)
J. J., you and few others take those people to their homes. We will continue to follow this fucking machine.

J. J.
OK Sir. We'll do so.

J. J. and four soldiers behind building very quietly evacuate people, leading them to the main road, while Lt. Smith and rest of the soldiers continue to follow robot in opposite direction.

EXT. BEYOND HILL - NIGHT

All people waiting call from Lt. Smith in very tense atmosphere. Many people think that all soldiers are dead. Suddenly, from communicator in Roberts hand Lt. Smith's voice can be heard.

(CONTINUED)

LT. SMITH
(VOICE)
This is Smith, do you hear me?

ROBERTS
Yes, we hear you Lieutenant.

In that moment all people relieved when they realize that Lt. Smith is live.

ROBERTS
Lieutenant, what is happened out there? Why did you cut connection?

LT. SMITH
(VOICE)
I'd had to, robot would notice us.

ROBERTS
I understand. What was actually happen?

LT. SMITH
(VOICE)
Robot was shot on the bus, and believe it or not there is no victims! We where evacuate all people from the bus.

On faces of all people around ship can be seen happiness and joy. They beginning to talk between them self's. Ship still light blue without blinking. Professor Carter talk with some people and goes to his helicopter.

MRS. DAVIS
Professor, where are you going?

PROFESSOR CARTER
I must go to the laboratory to make some calculations. One satellite was send measurement results from place where the wormhole was opened.

MRS. DAVIS
Alright, tell us if you find out something.

PROFESSOR CARTER
I will.

Professor Carter goes into the helicopter which start to fly immediately after Professor's coming-in. Rest of the people start to make theories and ideas about ship and robot.

INT. IN HELICOPTER - NIGHT

Professor Carter look at some results on his laptop and seems to be confused. He trying to understand but on his face can be clearly seen worry and fear. He look through the window and see buildings, his look is very serious and concerned. Two man which are together with him look him and they see that something bothering him.

MAN 1

Professor, is something bad about that results?

PROFESSOR CARTER

I'm not sure. Worst of all is that it seems to be very bad, but I can't be sure. I don't even know what this results going to tell me when I get into the laboratory.

MAN 2

What could that be?

PROFESSOR CARTER

This is something totally unknown. I never saw something like this. I never even think that something like this can exist.

He again look at laptop, and then through the window, with big wondering on his face. Few moments after that, one man call him from his institute with new report.

MAN

(VOICE)

Professor, we have bad news unfortunately.

PROFESSOR CARTER

What is it?

MAN

(VOICE)

The satellite which was make measurements in place where was open wormhole was suddenly disappear.

PROFESSOR CARTER

What!? What do you talking about?

(CONTINUED)

MAN

(VOICE)

It's simply incredible, we can't see it, it's just gone... It seems that we lost connection with him, but, we can't see him even optical you know...

PROFESSOR CARTER

I see... well I will be there in...

(To MAN 1 in helicopter)

For how long we will be in laboratory?

MAN 1

About half an hour.

PROFESSOR CARTER

About half an hour. You send another satellite immediately, and control him all the time.

MAN

(VOICE)

Alright sir.

PROFESSOR CARTER

Let that satellite search this one which missing and make new measurements. Speaking of that, what was it with latest measurements?

MAN

(VOICE)

We have them here, if you want we can sent you?

PROFESSOR CARTER

No, I'll be there for a half an hour.

MAN

(VOICE)

Alright sir.

They finished conversation. Professor Carter in even more confused. He doesn't talk with two man which are with him in helicopter. He pay attention on measurements that he was looking before man from laboratory called him. He trying to understand but every new idea seems to has no sense. He see institute from distance of about 400 meters and starts to pack for exit from the helicopter. Helicopter beginning to

approaches to institute and, in very early morning hours, outside can be seen four man waiting for Professor.

EXT. IN THE COURTYARD OF THE INSTITUTE - NIGHT

Helicopter is landed and Professor get out with two man. Four man from the Institute look at them while they waiting for them at the front door of institute. Professor Carter going to them expecting that he will hear some good news. MR. BROOKS is one of the people that cooperate with Professor's institute. He's a white man in late forties, with white hair, and is about 1,8 meters tall.

PROFESSOR CARTER

Mr. Brooks, if I remember...

MR. BROOKS

That's right Professor, nice to meet you.

PROFESSOR CARTER

Pleasure is mine. So, is it happened something new in meanwhile?

MR. BROOKS

We're not sure but something is definitely happening all the time out there, in Earth's orbit. I think that we shouldn't wasting your time here. It's best to go inside and look at satellite records.

All of them go into the building.

INT. IN OFFICE OF THE INSTITUTE - NIGHT

Professor Carter and others coming in one of the office with big projector and video beam. When they come to the office, they left doors opened. In the hall is one man from the security, standing at the doors. In office was already one woman which set up projector. She notice them and she is almost done, projector is ready to play last records of the satellite.

MR. BROOKS

Thank you ma'am, you can go now.

Woman get out of the office not closing the doors. Security man still walk close to the doors, like he is feeling born, he waiting for the end of his work-time. Professor Carter

(CONTINUED)

and Mr. Brooks preparing for watching new video records and they take laptops and other printed measurements. When they get everything close to their hands, they are ready to watch video.

MR. BROOKS

So Professor, shall we?

PROFESSOR CARTER

Absolutely.

Mr. Brooks start projector. All that what can be seen is only "normal space". They see only stars, nothing else from that perspective, as they see from Earth's orbit. At the same time they look at radio measurements and see huge radiation in place that they look in same time. Professor Carter look at printed report and try to compare it with video record. As he listing printed report, he see that it's coming some big oscillation. He waits to see what is going to happen in place in orbit, would that effect be visible. At video beam is steel same picture, no visible changes. Mr. Brooks was already watched video and he knows what is going to happen. He look to Professor Carter ones and is ready to warn him.

MR. BROOKS

Pay attention now Professor.

Professor Carter still look at video beam and in duration of about three seconds point in which was opened wormhole was just light similar like then when was wormhole opened. Professor Carter was surprise. He sudden changed his facial expression.

PROFESSOR CARTER

Can you turn back again, please? I must see again.

MR. BROOKS

Sure, but there's more Professor, you'll see...

He rewinds again that moment and again look to professor once, like he expecting his opinion. Professor Carter still watch very confused and thence. Trying to realize what is happening in place where was opened wormhole. After 8-9 seconds again appears same phenomenon but this time it was 6 seconds long and it was more lightning than the first time. Color of that is mostly combination of blue and green and purple in the middle.

(CONTINUED)

PROFESSOR CARTER

Could you stop for the moment,
please?

MR. BROOKS

Of course.

Mr. Brooks stop video and wait Professor's opinion or theory. On screen can be seen something like wormhole. Professor Carter thinking what could that be and try to calculate something on his laptop. Mr. Brooks watch him.

PROFESSOR CARTER

(Quiet, like for himself)

This is incredible.

MR. BROOKS

What Professor?

PROFESSOR CARTER

Hmm?

MR. BROOKS

What is incredible?

PROFESSOR CARTER

Well, modern science don't know nothing about this things, but I could make some theories. I can only use logic because nothing else can't help right now.

(stops few moments)

Incredible is that we know for wormholes, portals to other dimensions, black holes and other things for a long time, but this is somehow different to that phenomenon.

(He start to walk around office.)

This acts like some special portal, which is, how to define him, like it is open all the time.

MR. BROOKS

But it would be...

PROFESSOR CARTER

(Interrupt him)

I know. It would be lightning like in the moment when was ship came out. It isn't really open but it's in condition like stand by, if you know what I mean.

(CONTINUED)

MR. BROOKS

We trying, Professor.

PROFESSOR CARTER

I know that is difficult to understand, but believe me, it's also hard for me to understand it. Only thing that I can conclude from this results it that this... portal if I can call it like that, can be opened in any moment in same point, I mean, this point

(shows with finger to the screen)

is all time controlled by that, which was opened it. Whether is that this ship near Kansas, or something else from their world. But, as I said, I can use only logic and logic tells me that this ship controls that point, he look at him like his own portal to his world.

MR. BROOKS

Well, if I was understand, this is really incredible as you said.

PROFESSOR CARTER

It is gentlemen, and I hope that ship is controlling this, because if is anything else we would be totally powerless.

MAN 2

What can we do anyway? Was they find out anything about that ship?

PROFESSOR CARTER

It's time to find out. Call them.

Man 2 make a call to find out what is going on with ship. Mr. Brooks look at his watch for the first time and see that is 10 past 5.

MR. BROOKS

(To Professor Carter)

Very long night. We missed one night of sleeping.

EXT. BEYOND HILL - NIGHT

Almost is morning and all people still study ship's acting and other features. Roberts, Mr. Walter and Mrs. Davis together talk little bit far from the ship, while other people are close to ship, trying to make plan to open it.

MRS. DAVIS

This was a long night, isn't?

ROBERTS

Not for me, After everything I saw in last ten hours I think I'd won't sleep very well.

The communicator is received call from Professor Carter. Roberts going to communicator to answer.

ROBERTS

This is Roberts.

PROFESSOR CARTER

(VOICE)

Roberts, this is Carter.

ROBERTS

What have you got, Professor?

PROFESSOR CARTER

(VOICE)

Do you have anything new about that ship?

ROBERTS

Not much, we study it but we don't have much to tell...

PROFESSOR CARTER

(VOICE)

I have.

All people quickly react on Professor's phrase. They are surrounded Roberts and wait to hear Professor's news. On their faces can be seen a sign of hope and optimism.

ROBERTS

What is that Professor?

Roberts, Mr. Walter and Mrs. Davis look each other hoping that they will hear something that will not confuse them.

(CONTINUED)

PROFESSOR CARTER

(VOICE)

Well, I can't say that is the good news, but it's very important and maybe will be of crucial importance. It seems that the point in which was opened wormhole is somehow still active.

ROBERTS

What?

PROFESSOR CARTER

(VOICE)

Yes, you hear me. We were looking this latest measurements and it is only logical that we have case with all-time controlled portal in our orbit. With other words, the point in which was opened wormhole still make radiations and sometimes, in just few seconds light almost same like in the moment when was that ship came out.

All people are surprised with this Professor's report and they can't believe in this.

ROBERTS

That is incredible. We here can't believe to our ears.

PROFESSOR CARTER

(VOICE)

I know, but, believe me, we watched video record and this is only thing I can establish now.

ROBERTS

I see... well what we should do now?

PROFESSOR CARTER

(VOICE)

Nothing. You just keep study that ship and if you're able, try to open it. We could find out something if we open it.

ROBERTS

Yes, I know. We're trying, Professor...

(CONTINUED)

PROFESSOR CARTER

(VOICE)

I will make even more detailed measurements and I'll send more satellites out there, two already traveling. I've almost forgot, what was with robot?

EXT. ON THE STREETS - DAY

It is very early morning. Soldiers follow robot, which still act same, continue his programmed searching not paying attention on soldiers which are very careful. They surround him from almost all sides at the safe distances and in same time, they look out other people who could find them self's in this situation. Very soon, people will start to go to their works, and Lt. Smith is aware of that. He look at his watch and with signalization gives instruction to soldiers. Robot stops for a few seconds, look at his devices and seems like he's going to speed up. On his devices can be seen units that are more simple than the last time. They are sign that his searching should be continued to distance of few miles. Soldiers look at him and hope that he's going to leave the town. On streets still has no people. Robot starts to go much faster than before. He goes very quick, and soldiers are now forced to follow him running.

J. J.

Fuck! Now we have to run for him who knows how many miles.

LT. SMITH

Whatever we have to do, I just hope that he'll leave the town.

J. J.

Yeah, on some place where we'll could destroy him finally. All fucking night follow damn machine.

LT. SMITH

J. J., don't waste your strength on talking and pay attention on this machine.

J. J.

Sir, if we get in position to destroy him, would you give me that pleasure?

(CONTINUED)

LT. SMITH
Maybe, if you shut up.

They running for the robot and successfully keep safety in town. Robot will almost leave town but they are focused on citizens which are start to going to their works. In one street parallel from main team with Lt. Smith and J. J., man want to go in direction in which are they, following robot. Man was started his car and draws in direction where are soldiers. Soldier going to stop man and prevent all possibilities. He get closer to car and shows him to stop. Man opens his window.

MAN
What is it soldier?

51 SOLDIER
Sorry Sir but you can't go in that direction.

MAN
Why?

SOLDIER
We have an emergency situation here. I can't let you go here.

MAN
But I'll just go three and half miles, I must go to work...

SOLDIER
Sorry, but this isn't just for our mission, it's for your safety. You can't go here for a while.

MAN
What is going on, is some terrorists here or what?

SOLDIER
That is confidential information. I order you to stop here!

EXT. ON THE STREETS - DAY

Lt. Smith and soldiers follow robot which now goes slowly then few minutes ago. He'll almost leave the town and proceed to open field. He goes in direction where is one of the rivers, and Lt. Smith already has plan. While they follow him at the distance of about 70 meters, Roberts and Mr. Walter are called Lt. Smith.

(CONTINUED)

ROBERTS

(VOICE)

Lieutenant, what is happening with robot?

LT. SMITH

Nothing special. He make us running for several minutes, but most important it that he isn't shot anyone, he didn't have who in this morning hours.

ROBERTS

(VOICE)

I'm glad to hear that. How are you boys, are you tired?

LT. SMITH

Well it's the job we've chosen. Now we must follow an alien machine and save people. We'd like a little brake but you know...

ROBERTS

(VOICE)

Yes, it's very hard but you'll get maximum support. Where is robot right now?

LT. SMITH

He's going out from the town, just in time. People are start to go to their works you know... and now he goes through some uninhabited aria, thankfully.

ROBERTS

(VOICE)

What would he searching there?

LT. SMITH

I don't know nothing about that, but I do know that in this direction are river and few bridges.

ROBERTS

(VOICE)

So?

LT. SMITH

I want soldiers and tanks and guns around all this aria. He'll be very

(MORE)

(CONTINUED)

LT. SMITH (cont'd)
soon in contact with civilization
and traffic will be full of people.
We'll use everything we can to
destroy this thing. I don't care
about findings, I just want to save
people.

ROBERTS
(VOICE)
Of course, but we have another news
from Professor Carter.

LT. SMITH
What news?

ROBERTS
(VOICE)
Well, I wouldn't like to disturb
you boys but, it seems that the
portal from which was ship came
out, is somehow still active.

LT. SMITH
What!?

J. J.
What a fuck they talking about?

ROBERTS
(VOICE)
Yes, we also couldn't believe when
he told us but it is.

J. J.
So now what? More alien
motherfuckers will come and we have
to deal with them?

ROBERTS
(VOICE)
By now, we don't know nothing but
we'll let you know if we receive
some news.

LT. SMITH
OK. We must pay attention on robot
and, as I said: tanks, guns and
everything else if you want to save
people here.

(CONTINUED)

ROBERTS
(VOICE)
Alright Lieutenant. I'm over now.

EXT. BEYOND HILL - DAY

Roberts finished conversation with soldiers, and for the first time, he and others will try to open the doors of the ship. They'll use few methods including classic steel-car burglary. Few people taking their suits for maximum protection from lasers they'll use to open the doors of ship. Roberts and all others take secure position and prepare to watch this, mostly their designed idea. When was everybody ready and on safe positions, they start to cut steel part of the ship, around the doors. Ship starts to react on this with many lights and even sounds, like some alert to burglary, but it don't have any defense like shooting or explosion. Laser-cutting goes little hard but one part is already sliced. Now in place where the ship is sliced, can be seen something that looks similar to Earth's technology. Some electronic circuit's works on same principle like those in computers. Roberts is come close to ship to see that. It can be realized how that works, but couldn't be controlled. Ship still acting crazy with that flashes and sounds. Suddenly, ship stops with lights and noises. For a few seconds standing still and same reaction has robot which is followed by soldiers. Roberts still looking at ship and sees some wire which looks very similar to Earth's technology. He close his hand to touch wire and in that moment, when he almost touch wire ship suddenly start to light red, in place at the front, where is most aerodynamic. Roberts is again scared like in his first contact with ship. On his face can be seen sweat and confusion. Everybody stare at Roberts and ship. They look Roberts with admiration because they are enthusiastic about his courage.

ROBERTS
Damn, do I always have to be the
one who'll be scared by this ship?

In that moment, while ship still light red, Lt. Smith is called Roberts. Roberts answer to this call while he is still close to the ship which still light.

ROBERTS
What is it Lieutenant?

INTERCUT WITH:

EXT. ON THE FIELD - DAY

LT. SMITH

Gentlemen, I don't know what is happening there, but out here robot is stop and doesn't make any moves. He not responding to anything, like he's batteries are gone.

INTERCUT WITH:

EXT. BEYOND HILL - DAY

ROBERTS

(Look to others)
How long is he do that?

LT. SMITH

(VOICE)
About half a minute. Do you know what is going on?

ROBERTS

I think we do. We were cutting this ship very close to the doors and it was just rabid. After that it just light red at the front. Does robot light on any place?

LT. SMITH

(VOICE)
No, he just doesn't work, maybe you've damaged ship and robot seems to be useless.

ROBERTS

I hope so but we can't say that, we can only presume that. Anyway, you boys keep follow him. You know that this things are unpredictable.

INTERCUT WITH:

EXT. ON THE FIELD - DAY

LT. SMITH

OK, we'll do so.

All soldiers are happy thinking that robot and ship are really damaged and they start to joking and have fun. They are in field and nobody can't see them. Robot is about 50

(CONTINUED)

meters in front of them and they begin to approaching to him. They stare at him and joke. We see them through his eyes. Robot seems to record everything he see, but he don't react on anything. Robot's view is little different than before. Some units starts to showing in sides but he see everything in front of him.

J. J.

(To robot)

What now motherfucker!? Who's the boss now!?

Lt. Smith looking his soldiers and smiles like he think that it's done with robot, but still listen orders and is ready for unexpected.

LT. SMITH

J. J., don't be fool after all we've came through.

J. J.

What sir? He's finished.

LT. SMITH

How could you know? He is unpredictable. Take positions to safely look at him. We can sit behind him and, if he do something, we can react quickly.

All soldiers listen Lieutenant and sit behind robot. Lieutenant look at robot carefully. Robot stand still and not responding to anything. We can see some units through his eyes, also, it can be seen direction in which he is faced, like he see everything in front of him, but not responding to nothing.

EXT. BEYOND HILL - DAY

Roberts and Mr. Walter are closer to the ship than rest of the people and they try to understand principle of ship's technology. They look at place where is ship sliced and compare that wires and other components with some our technology. Professor Carter call them to tell them about his new measurements.

PROFESSOR CARTER

(VOICE)

Gentlemen, what did you do with that ship?

(CONTINUED)

ROBERTS

We're cut the ship very close to the doors. Why you ask that?

PROFESSOR CARTER

(VOICE)

Because, since you cut that thing, the wormhole is changed activity and for the first time, I can clearly see connection between ship and portal.

ROBERTS

What do you see professor?

INT. IN OFFICE OF THE INSTITUTE - DAY

PROFESSOR CARTER

Well, it's very hard to explain, but according to this, I can suppose that the ship is controlling portal. That is been logical to me and before this, but now it can be seen big radiation in that place. All of you better start evacuate right now, this can harm you.

INTERCUT WITH:

EXT. BEYOND HILL - DAY

ROBERTS

You mean to left this ship alone?

PROFESSOR CARTER

(VOICE)

Yes, you can monitor the ship and leave that place for your safety.

INTERCUT WITH:

INT. IN OFFICE OF THE INSTITUTE - DAY

PROFESSOR CARTER

Since you've been cut that part of the ship, it is start to light isn't?

(CONTINUED)

ROBERTS
(VOICE)

Yes.

PROFESSOR CARTER
That was resulting this effect and
now portal is active all the time.

ROBERTS
(VOICE)

But you said that portal was active
from the beginning, did you?

PROFESSOR CARTER
Yes but now it's visible all the
time, you know... It lights
identical like in the moment when
was that ship came out. I hope that
we will not see another ship from
the wormhole.

INTERCUT WITH:

EXT. BEYOND HILL - DAY

ROBERTS
We definitely wouldn't like that.

Roberts look to others which are start to pack and leave
that place. They are more scared when they heard Professor's
latest report. They look at Roberts and listen conversation
between him and Professor.

PROFESSOR CARTER
(VOICE)
But, I didn't tell you most
mysterious part of my measurements.

All people now stare at Roberts with greatest tension and
concern.

INTERCUT WITH:

INT. IN OFFICE OF THE INSTITUTE - DAY

PROFESSOR CARTER
(looking to measurements)
When I was saw that, I've found
something else. I was make few
radio measurements and in place
that is very close to the robot,
(MORE)

(CONTINUED)

PROFESSOR CARTER (cont'd)
which act similar like ship, is buried something that is connected with ship and robot at the same time. I can be sure that he searching for that, but I don't understand why he would do that so long?

ROBERTS
(VOICE)
What is that Professor? What could be so important?

PROFESSOR CARTER
It is something that I never seen before. The radiation is totally unknown and this definitely isn't something natural, I mean this is obviously some device that has been buried and I don't think that nobody on Earth have something with this.

Professor Carter takes new printed reports and try to find out more, while he talking with Roberts.

ROBERTS
(VOICE)
Do you have any idea what could that be? I should go there to find it.

PROFESSOR CARTER
From the beginning we was wondering what he could searching on Earth, and now we find something. This is obviously very important to them, whatever they are, and now we can try to find out what is that buried on our small planet.

ROBERTS
(VOICE)
What do you suggest?

EXT. ON THE FIELD - DAY

It's morning, between 8 and 9 hours. Robot stand still and not react on anything. We see some readings through his eyes. It looks like some calculations are almost done, while in background can be seen field in front of him. Soldiers

(CONTINUED)

stare at him, while all of them sit behind him. They are tired but everybody is careful and concentrated on robot. Some of them would like to lie on the grass, but Lt. Smith does not allow that. Lt. Smith behaves strictly and soldiers listen their superior. It's almost perfectly quiet among soldiers. They almost don't talk, everything that can be heard is airplanes which fly high and some birds in that field. They seems to be waiting for their superiors to call them and give them instructions.

LT. SMITH

(Look to the robot)

I can't wait to destroy this thing.

J. J.

Me too, sir. I hope that it would very be soon.

LT. SMITH

Yeah, but, I really don't know how we're going to do that.

J. J.

Well, all that scientist didn't sleep all night as we. They are probably find way to deal with this machine.

LT. SMITH

I hope so, but did you see how was he handle all that mines and bombs we shot on him? He was only falling down and isn't even scratched. So far, only was been enough some wonder to stop him.

J. J.

Yeah, this scares me.

LT. SMITH

Consider all his power and resistance, we should be happy that we're still alive.

Roberts calling Lt. Smith with communicator, while he at the same time speak with Professor Carter.

ROBERTS

(VOICE)

Lieutenant, are you there?

(CONTINUED)

LT. SMITH

We are here, we still looking at robot.

ROBERTS

(VOICE)

Good, I'm speaking with Professor Carter at this moment and he would like to speak with you. He has some plans.

LT. SMITH

OK.

PROFESSOR CARTER

(VOICE)

Boys, what is going on with robot? Tell me how he acts in latest two hours?

LT. SMITH

Nothing Professor, We here hope that he is finished but he just stand still. He doesn't move.

PROFESSOR CARTER

(VOICE)

Alright, you keep observe him and, I will come there with Roberts to make some measurements.

LT. SMITH

I couldn't let you do that! Do you know what this is? It can start to shot at any moment and kill us all!

PROFESSOR CARTER

(VOICE)

I know that this is risky, but we must do that.

All soldiers listen conversation surprisingly. Most of them are unsatisfied.

LT. SMITH

We here can barely protect us, Roberts may come, but you Professor... I wouldn't like that. I speak this for your safety.

PROFESSOR CARTER

(VOICE)

(MORE)

(CONTINUED)

PROFESSOR CARTER (cont'd)
I know Lieutenant, but believe me,
we must do that, it's very
important.

LT. SMITH
OK, but send more soldiers here
right now, before you come. I want
maximum protection. We must
surround him from all sides and
from different distances.

PROFESSOR CARTER
(VOICE)
Alright Lieutenant, if something's
happen, we'll call you.

LT. SMITH
OK.

Lt. Smith end up conversation and sit again on same place.
Soldiers are not satisfied with Professor's decision.

SOLDIER
Great! Now we must take care not
just for us, but for them too.

LT. SMITH
You heard them. We will continue
with their plans.

J. J.
Yeah, and if this machine kill that
"Mr. Einstein", we will be guilty.

LT. SMITH
No. We will not be guilty for
anything that we couldn't do.
Something like fight with space
terminator.

Lt. Smith manages to laugh soldiers and keep their
concentration and mood in mission. The atmosphere among
soldiers is good. They still cooperate very well. While they
speak mutually, one soldier notes other crews which approach
to them.

SOLDIER
Sir, it seems that we have backup,
some troops coming to us.

All soldiers look to them. On Lt. Smith's face can be seen
satisfaction and gratefulness. We see many soldiers closing

(CONTINUED)

to these near robot. They coming very noisy with trucks and tanks and every soldier which can be seen close to the robot, look at robot very strangely. Few tanks and trucks are parked near robot, and one helicopter is in the air, flying around soldiers. Lt. Smith signal to coming groups to not park at front of the robot. From the first truck coming out MAJOR JACKSON, the specialist, a black man, bald and almost two meters tall. He knows Lt. Smith.

LT. SMITH

Well, well, is that my partner from exercises?

Lieutenant and Major greeted warmly.

LT. SMITH

So, it seems that some alien terminator must come on Earth to government combine us.

MAJOR JACKSON

Where are great missions, there's me. You should know that.

LT. SMITH

Of course, now we are unbreakable.

MAJOR JACKSON

(Closing to robot)

So this is the machine which my friend follow all night with his soldiers?

LT. SMITH

Yeah, that thing was killed one man and woman in Kansas, last night.

MAJOR JACKSON

I know, I've heard.

They keep talking something which can't be heard, while we see them through the robot's eyes. His picture becomes more clearly. He see field in front of him, and some units are almost done in the bottom of his view. His picture is little red but he can register everything in front of him. Major Jackson come close to the robot's face, he stare at his eyes, which are red color, but they don't light. Major's face can be seen through the robot's eyes. He look robot very strangely, while robot seems to memorize Major. He saves Major's picture in the right corner in bottom in his sight.

INT. IN OFFICE OF THE INSTITUTE - DAY

Professor Carter preparing with other people for fly to the soldiers and robot. He takes all his reports and laptop, few communicators and his cell phone, to be in touch with soldiers and colleagues at any time.

MR. BROOKS

Did you get everything you need Professor?

PROFESSOR CARTER

I think I am.

(To MAN 1)

Call the NASA to see is there some new report from the satellite.

MAN 1 calling NASA, while Professor Carter and Mr. Brooks compare latest reports of the satellite. While Man 1 speak with someone in NASA, Professor Carter and Mr. Brooks looking at wormhole, which is still in same condition.

MAN 1

They will send latest report for a few minutes, it seems that they get processed one part of the report of satellite which is disappear.

PROFESSOR CARTER

What they got from that satellite?

MR. BROOKS

And what is happened with that satellite?

MAN 1

They say that satellite is still missing, no one knows where is now, but all records that has been sent before the satellite was gone, are now somehow processed.

PROFESSOR CARTER

So, we've could find out what is happened with the satellite.

In that moment report is delivered to one of the computers and they look at radio report and prepare to watch video footage.

PROFESSOR CARTER

Alright, let's see what was happen. Play the video.

(CONTINUED)

Man 1 starts video footage on video beam, and from a very first moment are visible radio interference that become bigger and bigger. As satellite going to portal, almost everything that can be seen is less visible and can be barely seen where is going. Professor look at printed reports and sees that coming big radiation wave, but on video is still same and satellite is almost at front of the portal, which was in that moment intermittently opens and closes, just before it is become active all the time. Now can be barely seen how portal opens like when the ship was came out and satellite is become to go inside.

MR. BROOKS

Dam! It's going into the wormhole!

PROFESSOR CARTER

Yes, I've already have few plans.

MR. BROOKS

But why it isn't stopped? Who knows where is now?

MAN 1

They said that they couldn't control the satellite. They wouldn't let it go there.

PROFESSOR CARTER

Yes, I've suppose that. Perhaps is good that the portal is still active. I will explain you while we traveling to NASA.

MR. BROOKS

Why we going to NASA?

PROFESSOR CARTER

There are now all people that are studied ship all night. We must make plans together and try to find out what is happening with this alien machines.

Video is almost at the end and they see only purple color, while the satellite is entered in the wormhole. The connection is now gone and video ends. They stand up and packs for traveling.

PROFESSOR CARTER

I just hope that satellite still works, wherever it is.

(CONTINUED)

MAN 1

But Professor, even if it still works, how can we find it and control it?

PROFESSOR CARTER

Maybe we can, we must try. Tell to NASA that we're coming right away and let all people which are studied ship wait for me there.

MAN 1

Alright sir.

Man 1 calls NASA and confirm their coming. Professor Carter and Mr. Brooks are ready and start to leave the office and go outside to the helicopter.

EXT. IN THE COURTYARD OF THE INSTITUTE - DAY

Helicopter is ready to go and all of them go into the helicopter which immediately starts to fly.

INT. IN THE HELICOPTER - DAY

Professor Carter work something on his laptop while other people looking through the windows. Professor Carter takes his communicator and calls Roberts.

PROFESSOR CARTER

Roberts, this is Carter, are you there?

ROBERTS

(VOICE)

We're here Professor, where are you?

PROFESSOR CARTER

We should be there for less than one hour. I've got something for you to do in a meanwhile.

INT. IN THE OFFICE OF THE NASA - DAY

All people are in one big office with a round table, considering all the facts and most of them listen conversation between Roberts and Professor Carter. Roberts is aside of them, close to the wall, while he speak with Professor Carter.

(CONTINUED)

ROBERTS

What is that professor?

PROFESSOR CARTER

(VOICE)

That didn't applied to you personally, I have job for one team of scientists. It's about that satellite which is disappeared. I've already created plans and instructions and I'll send you right now.

ROBERTS

OK, what should we here do?

PROFESSOR CARTER

(VOICE)

Nothing, just wait for me there and be ready to go to the soldiers.

ROBERTS

Alright.

INT. IN THE HELICOPTER - DAY

Professor Carter is just finished his instruction and send it to NASA. On his laptop can be seen "Sent" report and he start to do something other. Rest of the people look each other and expect something from Professor, but he not paying attention on them.

MR. BROOKS

Professor, we don't know nothing about our plans. What we'll do there and what did you sent to them?

PROFESSOR CARTER

Well, you can help me when we go to see the robot and that thing which is buried very close to him. We need to do some radio measurements.

MR. BROOKS

But what you told them to do about that satellite ?

PROFESSOR CARTER

I've make some strategies to try to make contact with satellite. It couldn't go so far from the other

(MORE)

(CONTINUED)

PROFESSOR CARTER (cont'd)
side of the portal and maybe we can
get it back here.

MR. BROOKS
Alright, if you say so.

INT. IN THE OFFICE OF THE NASA - DAY

All people are already saw Professor's instructions few
times and start to send two satellites to the portal, which
can be seen on big screen.

ROBERTS
I've never couldn't imagine
something like this. Professor
Carter is genius.

MRS. DAVIS
Yeah, I hope that it'll works.

MR. WALTER
What exactly should be done? I
didn't saw Professor's plan.

MRS. DAVIS
Well, according to Professor's
instructions, the satellite which
was disappeared in wormhole should
be very close to the other side of
the portal.

MR. WALTER
Yes, that's logical. So?

MRS. DAVIS
We'll try to find it with these two
satellites that going to the
wormhole. As you can see here in
Professor's instructions, he says
that wormhole can't be very deep.
We'll sent one satellite into the
wormhole, while it will be tied for
other in front of the portal.

MR. WALTER
I see, well what to say, it seems
that only Professor Carter can
create something like this genius
plan. I'm impressed.

(CONTINUED)

ROBERTS

Yeah, and in that rope will be few cables for communication and control, as well as command for self-destruction.

MRS. DAVIS

When should Professor be here?

ROBERTS

For less than half an hour.

MRS. DAVIS

OK, maybe we should call soldiers to see what is happening there.

EXT. ON THE FIELD - DAY

Robot stand in same position without any respond. Soldiers are on secure positions, most of them behind robot, with Lt. Smith and Major Jackson. Other soldiers are on few different locations with tanks and guns with powerful mines and bombs. We see robot from his right side in distance of about 60 meters. Two soldiers with big gun observe him. Lt. Smith and Major Jackson are made some type of cover about 30 meters behind robot. They observe robot with rest of the soldiers and they can't be seen from point in which is robot. The closest bridge is about 400 meters distanced from robot and is in left side of his view. Traffic on that bridge is low, a little number of vehicles traveling. Soldiers are almost perfectly silent. The communicator is received call from Roberts. Lt. Smith answers.

LT. SMITH

This is Smith.

ROBERTS

(VOICE)

Smith, this is Roberts.

LT. SMITH

What is it? You got something new?

ROBERTS

(VOICE)

Well, not really, except one operation that is in progress. We just want to hear you boys, what is happening there, is still same situation with robot?

(CONTINUED)

LT. SMITH
Yeah, he just stand in same point,
I hope that he won't make any move,
it could be lethal.

INTERCUT WITH:

INT. IN THE OFFICE OF THE NASA - DAY

ROBERTS
Yeah, well, you just keep observe
him and I'll be there with
Professor as soon as possible. We
first need to do one operation and
then we'll come to see what is that
for which robot is searching all
night and now is just in front of
him.

INTERCUT WITH:

EXT. ON THE FIELD - DAY

LT. SMITH
OK, we here waiting for you.

Lt. Smith end up conversation with Roberts and take secure position, while taking his rifle. While he looking at robot, he look at far place in front of robot, very close to the river, where should be buried device that robot is searching for.

LT. SMITH
Oh man, is this mission has the
end?

INT. IN THE OFFICE OF THE NASA - DAY

All people monitoring two satellites which approaches to portal. One man comes to Mrs. Davis to tell her that Professor Carter is come. She tells him to bring him there.

MRS. DAVIS
Professor is come just in time.
He'll be here in a minute.

Professor Carter coming in the office with Mr. Brooks. Mrs. Davis, Mr. Walter and Roberts come to Professor to see what should they do. All people working something on their computers.

(CONTINUED)

PROFESSOR CARTER

This is my associate from the
Institute, Mr. Brooks.

MR. BROOKS

Nice to meet you ladies and
gentleman.

PROFESSOR CARTER

So what was happen with satellites?

MRS. DAVIS

We monitor them from here. As you
can see on this screen satellites
are almost in front of the portal.

PROFESSOR CARTER

Good, I hope that we'll find
missing satellite, wherever it is.

ROBERTS

But Professor, how can you be sure
that rope of 50 meters will be
enough to keep these two
satellites?

PROFESSOR CARTER

I can't, but we'll find out soon.
What was with ship? Is still in
same condition?

MRS. DAVIS

Yes, we also monitor that thing
from here. It still make those
radiations same as from the start.

PROFESSOR CARTER

I hope that these signals are not
what I think they are.

ROBERTS

What you think Professor?

PROFESSOR CARTER

Well, it could be some
communication between them or just
control of the portal. I hope it's
this second.

ROBERTS

Yeah, who knows what kind of signal
could it sending out there.

(CONTINUED)

At this moment satellites are come at front of the portal. On big screen can be seen portal which is in same condition like before, it's active all the time.

PROFESSOR CARTER
Alright, here we are.

MRS. DAVIS
Take positions and do not let to both satellites to go into the wormhole.

All people that control satellites are on their positions and send commands to satellites. Mrs. Davis, Mr. Walter, Roberts and Professor Carter observe operation.

MRS. DAVIS
Alright, put that satellite into the wormhole.

On big screen can be seen picture of first satellite which goes into the wormhole. Picture has interference but mostly can be seen where is going. Satellite now coming in to portal and only purple color can be seen. After 6 seconds of same picture, satellite is coming out and in front of it is just normal space, nothing special can't be seen, except one big asteroid. All people are delighted in this great moment for science.

PROFESSOR CARTER
It's come through! I can't believe!

ROBERTS
Man, this is not seen every day!

PROFESSOR CARTER
Alright, can we see how long is rope inside of the wormhole?

MAN
About 4 meters Sir, it can go for 5 meters more.

PROFESSOR CARTER
OK, now let's try to find missing satellite.
(to Mrs. Davis)
Is everything in control?
Everything's OK?

MRS. DAVIS
Yes, we keep this satellite here.

(CONTINUED)

MAN

I think I've find the satellite.

PROFESSOR CARTER

Where is it?

MAN

See this readings? That is response to my signals.

PROFESSOR CARTER

Excellent. Can you get it back here?

MAN

Yes but that will take some time. I send commands to satellite and it'll respond to me in a few minutes.

ROBERTS

For how long can you get it back here?

MAN

I'm not sure maybe half an hour, but maybe more than two hours.

ROBERTS

OK, you just keep going. I suggest that we go to the soldiers and see what is buried there.

PROFESSOR CARTER

Yes, call soldiers and tell them that we coming, and provide some people for digging as soon as we get there.

ROBERTS

They will start to digging when we come there, right?

PROFESSOR CARTER

Sure, first I need to make measurements while that thing is still buried.

All scientist leaving the office while four people stay in office to control the satellites and monitor ship, which can be seen on one small screen.

EXT. ON THE FIELD - DAY

Soldiers observe robot which still stand in same position. We see some readings through the robot's eyes. Now, while the all soldiers are distanced from robot at least 50 meters aside him or 30 meters behind him, on his head can be seen some small short-time lights. His eyes can barely light red in less than a second. After few times of that short lights, his eyes now become to light for 2-3 seconds, and then disappear. Soldiers are unable to see this. Now, his eyes start to light more and more, while we see his view more clearly. His eyes now light very bright for a few seconds, and then stop with lightning. Few moments after that his left eye blinks blue five times and stops. Now we see through his eyes totally clearly, there is no red color in his view, only can be seen some units in bottom of his sight. From right corner of his sight appear picture of the Major Jackson, and then it goes in left corner in the top of his sight. Major Jackson talk something with Lt. Smith. We can't hear what they talking, as the other soldiers behind them, while they talk mutually. Communicator receives call from Roberts. Lt. Smith takes it from one soldier and answer.

LT. SMITH

This is Smith.

ROBERTS

(VOICE)

Roberts here, Lieutenant.

LT. SMITH

What is it, is there something new?

ROBERTS

(VOICE)

No, we just want to tell you that we'll be there for less than twenty minutes. Is there same situation?

LT. SMITH

Yeah, it's perfectly quiet, it's a little boring here but, better that than fight isn't?

INT. IN THE HELICOPTER - DAY

ROBERTS

(Continues conversation with
Lt. Smith)

Sure, you just keep eye on him and we'll be there soon.

(CONTINUED)

LT. SMITH
(VOICE)

OK.

EXT. IN OPEN FIELD NEAR KANSAS - DAY

We see three helicopters flying to the area where is robot. We see Roberts and Professor Carter in one helicopter through its window.

INT. IN THE HELICOPTER - DAY

Roberts and Professor Carter are almost ready to go. They get all necessary equipment they have.

PILOT
I see them Sir, there they are.

ROBERTS
Do not land in front of that robot, understand?

PILOT
Yes Sir!

ROBERTS
And tell to other pilots to follow us, to land behind all soldiers.

EXT. ON THE FIELD - DAY

Soldiers see helicopters and signal them to land behind them. We can barely see helicopters through the robot's eyes, in the top of his view, just for a few seconds. Robot not responding to this. The first helicopter is landed. Roberts and Professor Carter coming out with few people and Mr. Brooks. Second helicopter is landed and Mr. Walter and Mrs. Davis coming out with other man. Lt. Smith comes to them and meets them. Roberts coming and meets with Lt. Smith.

ROBERTS
We've finally met Lieutenant, I hope that we'll now dill with this machine.

LT. SMITH
You can't imagine how much we here want to destroy him.

(CONTINUED)

ROBERTS

Maybe we can, but first we need to make some measurements. Let me present the most intelligent man that I know. This is Professor Carter.

LT. SMITH

Nice to meet you Professor.

PROFESSOR CARTER

Pleasure is mine lieutenant. We all admire you for saving all those people from the bus.

LT. SMITH

I just hope that won't be similar situations, we have to be very careful. So, what is the plan? What we do now?

ROBERTS

Professor will complete these measurements and we'll dig that alien device which is buried out there.

LT. SMITH

I suggest that you go there with helicopter and we'll cover you. We must pay attention on robot, he's unpredictable. By the way, what is so important here? What you want to dig up?

ROBERTS

According to Professor's measurements here is buried something which this robot searching. It's probably some kind of device but we don't know nothing about it.

PROFESSOR CARTER

It's interesting that he's stopped just about 300 meters from his finish line, after he searching all night for it.

ROBERTS

So Professor, shall we?

(CONTINUED)

PROFESSOR CARTER

Let's go.

LT. SMITH

(to soldiers)

OK boys, this helicopter will take Professor and rest of the crew there, and we'll be watching on robot while they make measurements.

Roberts and Professor Carter goes into helicopter together with Mr. Brooks and few people. Helicopter takes secure position and wait for Lt. Smith's signal to go. Lt. Smith, Major Jackson, J. J, and six soldiers go to robot and make secure type of cover. They lie on grass and point their guns on robot. We see them through the robot's eyes, robot see how they mask in grass, about 30 meters in front of him. One soldier is came from backup. He has special gun with lasers which was Roberts gave him. We see robot through the laser-gun's sight.

INT. IN THE HELICOPTER - DAY

Roberts, Professor Carter and rest of the crew are ready and wait to go. Roberts prepare his laser gun and look to robot through window.

PROFESSOR CARTER

Was that same type of weapon you gave to that soldier?

ROBERTS

Yes, this is the best we have.

INTERCUT WITH:

EXT. ON THE FIELD - DAY

LT. SMITH

(to soldiers)

Are you ready?

SOLDIER

Yes Sir!

LT. SMITH

(to communicator)

OK, you may come.

INTERCUT WITH:

INT. IN THE HELICOPTER - DAY

LT. SMITH
(VOICE)
We watch your back.

ROBERTS
(to pilot)
You can go.

INTERCUT WITH:

EXT. ON THE FIELD - DAY

Helicopter starts to fly in direction where is buried device. We see helicopter how flies above robot. We barely see helicopter through the robot's eyes in top of his view.

INTERCUT WITH:

INT. IN THE HELICOPTER - DAY

Professor Carter look to his measurement device and see how readings becoming stronger as they approaches to that point. He look through window at place where is buried device.

INTERCUT WITH:

EXT. ON THE FIELD - DAY

LT. SMITH
J. J., are they landed there?

J. J.
They just landed, Sir.

INTERCUT WITH:

INT. IN THE HELICOPTER - DAY

ROBERTS
OK, let's go.

EXT. ON THE FIELD ASIDE RIVER - DAY

The crew comes out the helicopter. Professor Carter see clearly on his device from where radiation coming. He tells to few man to start digging. They get their tools from the helicopter. He point his finger on point where should they dig up. They start to dig.

EXT. ON THE FIELD - DAY

Mr. Brooks, Mrs. Davis and all other people are in same place, behind soldiers. They have all-time communication with NASA and they monitor ship and wormhole. We see wormhole and satellite in front of the wormhole on one of the computers.

INT. IN THE OFFICE OF THE NASA - DAY

One man and one woman monitor two satellites which try to bring back the one that's missing. On one small screen is view of the satellite which is in Earth's orbit in front of the portal. We see open portal on screen, and rope from this satellite which is entered in wormhole and connects other satellite. On the other, bigger screen is view of the satellite which is at the other side of the portal. We see only stars and one asteroid, which is near satellite.

MAN

Who knows what we looking right now? No one knows where is this place.

WOMAN

Yeah, it may be a billion light years away.

MAN

Imagine that. We looking at that part of the Universe in a real-time. Not like through telescopes, you see how it was it in past. This is how is there at this moment.

WOMAN

For how long you'll get that missing satellite? Is that it?

MAN

Yeah, this red point. I controlling it. For less than ten minutes it'll be in our orbit.

EXT. ON THE FIELD ASIDE RIVER - DAY

Roberts and Professor Carter look at place where few people dig. Few soldiers looking in direction where are Lt. Smith with his soldiers and robot. While they dig up, they find some kind of metal alloy, totally unknown, it's there to protect device.

MAN 1

Professor, here's some kind of metal.

PROFESSOR CARTER

Let me see. A-ha, this is probably shield and below is the thing that we looking for.

ROBERTS

Can you cut it?

MAN 2

Probably, just to get one cutter. Man 2 goes into helicopter and gets few tools. Communicator receives call. Roberts answer.

MR. WALTER

(VOICE)

Roberts, how's the thing going?

ROBERTS

We've find some kind of metal and we cut it right now. It's going little heavy but we'll finish soon.

MR. WALTER

(VOICE)

Alright, let us know as soon as you find something.

ROBERTS

I will.

Two man are almost done. They were cut one side of the top of the shield, which is about two meters. Now, hole which are they dig up is about two and a half meters deep and three to four meters wide. It can be seen metal cube in that hole. They start to fold sliced piece of metal of the shield. As they fold it slowly, in cube can be seen device. It looks like some cube with half of a ball on its top. The half of a ball on the top of device is made of glass, and through that part can be seen something which looks like diode and electronic circuits. Some of them are blue and red

(CONTINUED)

color, and two biggest are green. Cube is titanium color. Roberts and Professor Carter stare at device.

ROBERTS

Can you boys get it out here?

MAN 1

Let's see, I hope it's not too heavy.

Man 1 and Man 2 gets the device and very carefully leave it out of the hole, in front of Professor Carter. Roberts goes aside the helicopter and he's informed others that they've find device.

INT. IN THE OFFICE OF THE NASA - DAY

On big screen can be seen satellite which was missing. It's almost coupled with satellite on the other side of the portal. Man and Woman control them and give command on their computer to this satellite connect other using magnets. The satellites are connected and main satellite from Earth's orbit start to pulling them back. We see how first satellite starts to go into the wormhole backwards, as the main pulling it. While this satellite is almost entire in wormhole, the third satellite is coming into the wormhole.

EXT. ON THE FIELD - DAY

All people watch this on one big screen near helicopter and see how satellites were entered in wormhole.

MR. WALTER

Professor will be amazed with this.

MRS. DAVIS

If he could only find out where these satellites are been?

INTERCUT WITH:

INT. IN THE OFFICE OF THE NASA - DAY

MAN

(looking to portal on big screen)

So, that's it ladies and gentleman. Our journey to other galaxy is finished.

(CONTINUED)

Suddenly, on screen can be seen another alien ship, very similar with "UFO 436". It comes out of the wormhole and goes in direction where are satellites.

MAN

Oh shit! It's going here!

INTERCUT WITH:

EXT. ON THE FIELD - DAY

On all screens can be seen ship which goes to the Earth. All three satellites record it and each of them plays its own view to the ship.

MRS. DAVIS

Oh no! The last thing we need is a
UFO 437!

MR. WALTER

I must tell to Roberts and
Professor to get out of there!

EXT. EARTH'S ORBIT

The ship goes toward the satellites, which are all connected with rope and magnets. We see how ship closing to satellites, while it traveling much faster. We see all three satellites, the ship and the portal. Ship starts to fire on satellites and destroying them.

INTERCUT WITH:

EXT. ON THE FIELD - DAY

All people were seen this and after ship's firing connection is gone. All three satellites are destroyed. People get panic and start to evacuate. All helicopters are ready to go as soon as people get in.

INTERCUT WITH:

EXT. EARTH'S ORBIT

After it's destroyed satellites, ship continues to fly to Earth. The portal is disappeared after the ship is destroyed satellites.

EXT. ON THE FIELD ASIDE RIVER - DAY

Roberts answer on communicator while Professor Carter study device.

ROBERTS
Roberts here, what you got?

MR. WALTER
(VOICE)
Roberts, leave that place right now!

ROBERTS
What is happened?

MR. WALTER
(VOICE)
We have another ship coming up! I repeat, another alien ship is coming! Leave that thing before it's too late!

ROBERTS
Alright Sir, we'll leave it immediately.

Roberts and rest of the people get into helicopter which immediately starts to fly in direction where are other helicopters. In moment when helicopter is turn in that direction, on sky can be seen ship which coming very fast. We see helicopter and that ship trough the robots eyes, which are start to light red. Ship goes toward the device aside river very fast and very noisy. While the helicopter is at the half of his way to others, ship is fall down. Similar like the first one, this opens immediately after it's landed. Robot comes out rashly and stare at device few seconds. Then, he looks to robot which still stands with no response. We see first robot through the eyes of the second robot. The picture is little different and with different readings. Now we see that robot through the eyes of the first robot.

EXT. ON THE FIELD - DAY

Lt. Smith and his soldiers are still in same place, but robots don't pay attention on them. They look to both robots and prepare for firing.

J. J.
Oh fuck! Oh fuck man! Now we're dead.

(CONTINUED)

LT. SMITH

Everybody quiet! You see that they don't pay attention on us? We're no threat to them, obviously.

We see readings through the eyes of first robot. He receives something from this second robot. Suddenly from the right corner in the bottom of his view appears picture of Major Jackson. Now, robot's head start to blink blue and eyes light red all the time. On the other side where are helicopters, people are hidden behind helicopters. Soldiers are told them to not fly.

SOLDER

Let all people stay behind helicopter! Robots could shot on helicopters if they notice them!

Roberts is with few soldiers. They prepare guns and take positions to fire on robot. Mr. Walter, Mrs. Davis, Professor Carter and Mr. Brooks are behind helicopter and monitor both ships and both robots on few screens. Roberts is take one big powerful laser-gun and aim at robot. Lt. Smith see robot through his gunpoint. Robot starts to go toward Lt. Smith's crew.

INTERCUT WITH:

EXT. ON THE FIELD ASIDE RIVER - DAY

Second robot approaches to device and stare at it. We see device through his eyes. Readings and calculations are much faster than those of first robot.

INTERCUT WITH:

EXT. ON THE FIELD - DAY

Roberts calling Lt. Smith with communicator. Lt. Smith answers.

LT. SMITH

I think that you can't help us now, he goes here, he recorded us.

ROBERTS

(VOICE)

Just be careful Lieutenant, I'll cover you. Watch that robot out there, what he's doing?

(CONTINUED)

SOLDER

He stare at device.

LT. SMITH

He's almost here and he'll burn us!
We must fire!

ROBERTS

(VOICE)

I'll fire! You start to run and
order to soldiers from left and
right side to fire.

LT. SMITH

OK, start to fire immediately!

Robot is fifteen meters from Lt. Smith. Roberts start to fire on him. Robot start to fall down and get up after this shots, but on his body can be seen damaged parts. Lt. Smith and his crew start to run to one of the tanks at left side of the robot. Robot not paying attention on Roberts's shots no matter that it harm him. We see Major Jackson through his eyes and his picture in left corner of his view. While Roberts still shot on him, robot can hardly shot on soldiers with Lt. Smith. No one's shot, but they all turn around to robot and fire on him. He see their faces. Roberts is much closer and shot on robot. Robot falls down and start to light with different colors. He lie on his stomach. They all stare at him. Suddenly, he move his hand and shot on Major Jackson. Major is dead. His body is melted. Lt. Smith and others jump on grass. Roberts again shot on him. He shot on robot's head. Robot lie on grass. Lt. Smith and others change position and get closer to Roberts. Roberts has robot's head on sight. We see robot on the Roberts's gunpoint. Roberts's finger is on trigger. One of the Lt. Smith's soldiers has notice second robot about fifty meters behind them.

SOLDER

Oh shit! Lieutenant!!!

They all turn around to second robot which was just point his gun on them. Roberts shot on that robot and soldiers run in direction where are all other soldiers and helicopters. Roberts still shot on robot which just fall down and tries to stand on his legs.

LT. SMITH

Everybody on the positions! Roberts
is save our lives, we must save
him!

All soldiers comes close to Roberts and start to shot on robot. Robot barely stand on his legs.

(CONTINUED)

LT. SMITH
(to communicator)
Fire!

The tanks start to fire on robot from both sides, while soldiers still fire and tries to shot his head. Huge explosion is seen among entire aria. Robot fall down and seems powerless. Both robots lie without any blinks and lights. Fire still burning around two robots.

LT. SMITH
Let everybody stay far from robots,
they could stand up at any moment.

INTERCUT WITH:

EXT. ON THE FIELD ASIDE RIVER - DAY

The ship is about sixty meters from device. The device is still in same place. It doesn't react on nothing. The ship starts to light green at one part within doors. That part opens and comes out some kind of antenna, which doesn't separate from the ship. Antenna turns in direction where is device. It starts to make unpleasant noises which can be heard in place where are soldiers and robots.

INTERCUT WITH:

EXT. ON THE FIELD - DAY

LT. SMITH
Oh shit! I knew it's not over! All
of us must leave this fucking
machines. They could shot on us.

ROBERTS
Lieutenant, prepare to watch my
back. I have a plan.

LT. SMITH
What is on your mind?

ROBERTS
I think that I finally figure out
what could finish this agony.

Roberts's communicator is received call from Professor Carter. Roberts answer.

(CONTINUED)

ROBERTS
What you got?

PROFESSOR CARTER
(VOICE)
Even more mystery, unfortunately.

ROBERTS
What is it?

PROFESSOR CARTER
(VOICE)
My assistants from Institute were
find another device about sixty
miles from here.

ROBERTS
That is phenomenal!

PROFESSOR CARTER
(VOICE)
What? I don't understand?

ROBERTS
I'll explain you later. I have few
plans.

Roberts end up conversation.

ROBERTS
Lieutenant, whatever you do, don't
let this robots shot on me. You and
your soldiers must cover me. Give
the order to soldiers with tanks to
be ready at any moment and you'll
watch at robots while I go to ship.

LT. SMITH
You want to destroy ship?

ROBERTS
Absolutely. In fact, I'll destroy
both ships.

They start to organize and take positions. Lt. Smith gives
an order to his soldiers. Roberts goes to helicopter to take
necessary equipment and gives instructions to few soldiers.
Helicopter is ready and starts to fly when Roberts was get
in.

INT. IN THE HELICOPTER - DAY

Roberts is with three soldiers. They see robots while they fly above them and then ship near device.

ROBERTS

Did you understand me? Whatever happens we must to ready. I maybe figure out how this machines work.

EXT. ON THE FIELD ASIDE RIVER - DAY

Ship still lights green and make noise. Device not responding. The helicopter is landed and crew comes out. Roberts immediately point his gun to ship and fire close to the doors, in similar place where he was cut first ship. The ship stops with noise and lights. Soldiers are happy thinking that Roberts is done everything, but he takes his communicator and calls Lt. Smith.

ROBERTS

Lieutenant, be very careful now. Both robots could be stand up.

Lt. SMITH

(VOICE)

I know, we both have experience with this.

Roberts goes to device, while other soldiers watch ship. Roberts look at device and metal cube from which was device extracted. Suddenly, ship starts to light red. Solders signal to Roberts. He signal them what to do.

ROBERTS

Plan "B"! Roberts take communicator but Lt. Smith has already called him.

LT. SMITH

(VOICE)

Roberts, guess what?

ROBERTS

Robot was start to light?

LT. SMITH

(VOICE)

Yeah.

ROBERTS

If he stand up let him go here, we have our plan.

(CONTINUED)

LT. SMITH
(VOICE)

OK.

EXT. ON THE FIELD - DAY

Soldiers are moved to not be noticed by robot, which barely stands up and goes to device. Soldiers follow him.

EXT. ON THE FIELD ASIDE RIVER - DAY

Roberts and soldiers look at robot which approaches to them. They start to take positions. We not see where they were hide. We see through robot's eyes. The device can be seen in distance of about twenty meters. Robot is now very close to device. We see readings through his eyes. He stare at device. Suddenly, the helicopter is started and its propellers start to turn around. We see one hand of soldier how pulls rope which is tied for helicopter's control lever. Helicopter starts to go slowly toward the robot. Robot sees helicopter and point his gun on it. Roberts suddenly comes out of the hole from which was dig up device and start to shot on robot. Robot was shot on helicopter only one time. The helicopter still goes to robot, which can't do nothing because Roberts shot on him. The helicopter will almost strike robot. Roberts activate bomb, which is behind device, on the opposite side of robot. Roberts starts to run very fast. Robot has barely shot on helicopter. Roberts is about ten meters distanced. Bomb explode in same moment when the helicopter was hit robot. Huge explosion is seen from all sides. Roberts jumps in a very last moment. Roberts and solders are now together in place where was explosion. They see that helicopter and device are almost totally destroyed, but robot is still in one piece. They go to the ship. Roberts first point his gun, and then rest of the soldiers were point their guns.

ROBERTS

Fire!

They shot on the ship with all power they have. The ship is almost burned. All people coming to see what was happen. One soldier explains them.

ROBERTS

Sorry Professor, but I'd have to destroy everything. It was too dangerous.

(CONTINUED)

PROFESSOR CARTER

Sure, we got another device buried here, very close.

ROBERTS

You know what kind of threat is that?

PROFESSOR CARTER

Of course, it can bring another robots. We must be ready.

ROBERTS

Yeah. Well I think that it's enough for one day.

PROFESSOR CARTER

Yes, we finally can go to our homes.

INT. IN OFFICE OF SPECIAL LABORATORY - DAY

On doors can be seen sign "DANGER, STRICTLY PROHIBITED". We see big room made of special glass. Inside are both robots, part of first ship which is very similar to Earth's technology, and second device, just excavated, exactly the same as first device. Professor Carter coming to talk with people from the laboratory.

PROFESSOR CARTER

Gentleman, is everything in control?

MAN

It is Professor, we can start to work. By the way, did you get measurement results about wormhole?

PROFESSOR CARTER

Yes, I am.

MAN

So? Did you find something?

PROFESSOR CARTER

Believed or not, the other side of the portal was one aria in Andromeda galaxy.

They continue to talk and prepare to make analysis. We see parts of the ship.

DISSOLVE TO:

EXT. BEYOND HILL - DAY

Near the place where was first ship landed, can be seen small part of some device. It starts to blink blue for a few seconds and stops.

FADE OUT:

THE END
